GARGI GHOSH

OBJECTIVE

I am a dedicated B-Tech student in Computer Science and Engineering at the University of Engineering and Management in Kolkata. I have a strong passion for software development and have experience in Java, MySQL, HTML, CSS, and JavaScript. I quickly adapt to new technologies and have a strong problem-solving ability. I stay updated with industry trends and continuously seek opportunities to learn and grow in the field of software development.

EDUCATION

University of Engineering & Management (UEM), Kolkata

77.28%

PROJECTS

Airline Reservations System

• Developed an airline reservation system ticket booking software using java Swings and MySQL with a frontend and backend.
• According to the convenient date, the admins can handle all the data: delete, edit, and add flights and multiple works.
• Booked flights for customers, downloaded tickets for their flights, and saved them in their system at any time from the software.
• It has a very user friendly user interface and very well-maintained secure software.

Movie recommendation system

In Python, a movie recommendation system using a dataset typically involves loading and exploring the movie dataset, performing data cleaning and preprocessing, extracting relevant features, and calculating similarities between movies based on those features.

Online shoping system

An online shopping system in Java includes user registration and authentication, a product catalog, shopping cart functionality, order processing, and payment integration. Users can browse products, add them to their cart, place orders, and make payments securely.

HOBBIES

Learning new things

Music listening

Spending Free Time With family

CERTIFICATES

Core Java Specialization From Coursera

OOPs in Java From Great Learning

Web Development Fundamentals:Html5 and Css3 From Udemy

Sorting Algorithm in C From Great Learning
